## **J.D. Byrider Endorses NEXTEK Emissions-Mate**

*J.D. Byrider to outfit all franchise stores with NEXTEK Emissions-Mate*

— **January 29, 2010** — J.D. Byrider, known for its friendly service and delivery of dependable used cars with expert servicing and affordable on-site financing, outfits corporate dealerships with the NEXTEK EMISSIONS-MATE.

J.D. Byrider selects the NEXTEK EMISSIONS-MATE as the ideal tool for testing the status of emissions monitors and performing drive cycles. Ed Cowan, J.D. Byrider Company Stores Service Director, states “The EMISSIONS-MATE has already saved hundreds of hours for our dealerships. The beauty of this product is its simplicity and speed. Anyone can use it to perform an emissions monitor status check and to perform drive cycles. For drive cycles, just plug it into the vehicle and drive... when you hear the beep and the lights turn green, you’re done. All the monitor indicators are right there in front of you on one simple display screen. There is no booting, unplugging and re-plugging, or scrolling up and down through menus... common with scan tools. It is simply plug, play and read the front panel (all lights Green or Red; Yes or No). It’s that simple!

The EMISSIONS-MATE will be a standard tool in every one of our corporate dealership’s toolbox. We didn’t need another gadget or ‘quasi’ scan tool or code reader for

checking monitors. If there is a trouble code, we end up attaching the vehicle to our high-end scantool anyways. We just needed a simple and handy tool for checking monitor status and performing drive cycles... period! This is exactly what the EMISSIONS-MATE does. No more time consuming booting of a scan tool and fumbling through drill-down menus to determine monitor status. No more 'driving-around' wondering if a monitor is set... Time is money! This device saves us time every day."
